

Naveen Kumar Sheerla

Full Stack Developer – React.js, Next.js & Node.js

sheerlanaveenkumar@gmail.com +91-8328555871 linkedin.com/in/sheerla-naveenkumar

SUMMARY

Results-driven Frontend Developer with **3+ years** of experience specializing in **React.js** and **Next.js**, with a strong foundation in building scalable, responsive web applications. Adept at **performance optimization**, **secure authentication**, and **state management** using Redux, Zustand, and React Query. Passionate about modular code, UI/UX design principles, and delivering high-quality digital experiences, with growing exposure to build tooling beyond Next.js (Vite) and backend fundamentals.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, HTML, CSS
Frameworks	React.js, Next.js, Vite
Styling & UI	Tailwind CSS, shadcn/ui, Material UI, Ant Design, Bootstrap, Responsive Design
Build Tools	Webpack, Vite, Babel, ESLint
State Management	Redux, Redux Toolkit, Zustand, Context API, React Query
Auth & Security	NextAuth.js, Keycloak, JWT, Supabase Auth, Role-Based Access Control
Testing	Jest, React Testing Library
Version Control	Git, GitHub
Cloud & Deployment	Vercel, Netlify, AWS, CI/CD pipelines
Backend	Node.js, Express.js, MySQL, MongoDB
Other	Figma, Jira, Agile/Scrum methodologies

PROFESSIONAL EXPERIENCE

Frontend Developer — mTouch Labs Private Limited	<i>Jul 2025 – Present</i>
- Built core modules of an internal CRM, HR, and project-management platform (leads, deals, clients, projects, tasks) using Vite, React, and TypeScript, cutting page load time by 28%. - Designed a multi-tab project details dashboard consolidating tasks, meetings, calls, and reports into a single view, reducing average navigation clicks per task by 45%. - Implemented a speech-to-text-enabled CRM workflow for hands-free lead and deal logging, cutting manual data-entry time by 30% for sales reps. - Built the HR portal module — job opening management, recruitment lead tracking, and add/edit dialogs — using shadcn/ui and Tailwind CSS, reused across 3+ CRM modules to speed up feature delivery.	
Frontend Developer — Apaar Software Technology Service Pvt. Ltd.	<i>Apr 2023 – Jul 2025</i>
- Developed scalable UI components for Next.js applications, improving performance by 30%. - Implemented role-based access control (RBAC) and secure authentication using NextAuth & Keycloak. - Optimized API integrations using React Query, improving data synchronization efficiency by 40%. - Developed custom reusable UI libraries, enhancing code reusability and maintainability. - Improved frontend performance by optimizing lazy loading, code splitting, and caching, reducing load time by 25%. - Built a reusable data table (sorting, pagination, filtering) and schema-based form validation (React Hook Form, Zod, Yup), reducing user errors by 40%.	

PROJECTS

Zunosync — AI Social Media Management Platform
- Built the frontend for an AI-powered social media command center supporting publishing to Instagram, LinkedIn, X, TikTok, Facebook, and YouTube from a single dashboard. - Developed the AI content assistant UI for generating platform-optimized posts with brand voice, hashtags, and visuals. - Built calendar-based scheduling and a content library with media tagging and metadata management.

- Implemented **team collaboration with RBAC** (owner/admin/editor/viewer roles) and multi-step approval workflows.
- Integrated **Supabase** for auth and data, **Razorpay** for payments, and **TanStack Query** for server-state and caching, with **Vitest** test coverage across shared modules.

React, TypeScript, Vite, shadcn-ui, Tailwind CSS, TanStack Query, Supabase, Razorpay, Vitest

Zunosync — Marketing Landing Page

- Built a **high-conversion, SEO-optimized marketing site** on the Next.js App Router, covering hero, use-cases, benefits, and pricing pages.
- Implemented a **dynamic INR/USD pricing page** with region-aware currency switching.
- Configured full **OpenGraph, Twitter Card, and Schema.org JSON-LD** metadata for maximum search and social visibility.
- Designed a custom **glassmorphic dark-theme design system** with Framer Motion micro-interactions.
- Built an **Axios-based API client** with interceptor-driven token management for blogs, subscription plans, and contact endpoints.

Next.js 16 (App Router), React 19, Tailwind CSS 4, Framer Motion, TanStack Query

CRM & Business Operations Platform

- Built a **unified CRM, HR, and project-management platform** covering leads, deals, clients, projects, and tasks.
- Implemented **speech-to-text logging** for hands-free lead and deal entry in the CRM workflow.
- Designed a **multi-tab project details dashboard** consolidating tasks, meetings, calls, and reports per project.
- Built the **HR module** for job opening management, recruitment lead tracking, and team/role administration.

Vite, React, TypeScript, shadcn/ui, Tailwind CSS

stacX — Cloud-Based Technology Platform

- Built a **modular SaaS platform** spanning organization management, school administration, expense tracking, volunteer management, and employee management.
- Implemented **secure authentication and RBAC** across user roles, departments, and resources.
- Built **real-time data visualization** dashboards and multi-currency expense/approval workflows.

Next.js, Material UI, Node.js, RESTful APIs, NextAuth

MCV MotoCorp — Vehicle Sales & Management App

- Built an **inventory management** interface for tracking stock levels, vehicle details, and branch-wise availability.
- Implemented a **multi-branch sales tracking dashboard** with real-time updates.
- Built a **customer interaction module** for test-drive bookings, purchase history, and service scheduling.

EDUCATION

Master of Computer Applications (MCA)

Graduated 2019 · CGPA 6.6

University College of Science, Osmania University, Saifabad, Hyderabad

CERTIFICATIONS & LEARNING

- React JS (Intermediate) — Scaler Academy, 2023
- Exploring GraphQL for backend API optimization; improving backend proficiency in Node.js & Express.js
